

## Fridge Shelf for the VW California T7.0

### Installation instructions

#### Introduction

This Fridge Shelf has been designed to be installed without tools and without the need for any permanent alterations to your VW California, the process should take approximately 5 minutes.

#### Components

ID	Part	Description	QTY
A	Outside shelf support		4
B	Inside shelf support		2
C	Large shelf		1
D	Small shelf		1

#### Installation steps

1. The outside shelf supports (A) have one flat face and one face with a cross on it. Insert the cross with the long axis aligned vertically as shown in Figure 1 through a hole in the outside edge of the fridge side mesh. The smooth face on the shelf support faces outside the fridge, and the cross faces inside. With the groove around the circumference of the shelf support positioned centrally in the mesh of the fridge side panel, rotate the shelf support so that the long axis of the cross is aligned horizontally as shown in Figure 2, this will lock it in place.

2. Place 2 of the outside shelf supports (A) on each outside edge of the fridge, and 2 of the inside shelf supports in the central mesh divider of the fridge. Ensure that they are aligned at the same height as shown in Figure 3.
3. Slide the shelves into the horizontal slot which forms the long axis of the shelf supports. Note that the shelves can also be inserted vertically using the slots that form the short axis of the shelf supports if desired.

### **Figures 1-3**

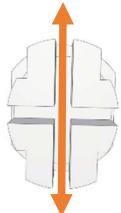

Figure 1 – Insert the shelf support through the mesh fridge sides with the long axis vertical.

Figure 2 – Rotate the shelf support so that the long axis is horizontal to lock it into the fridge mesh sides.

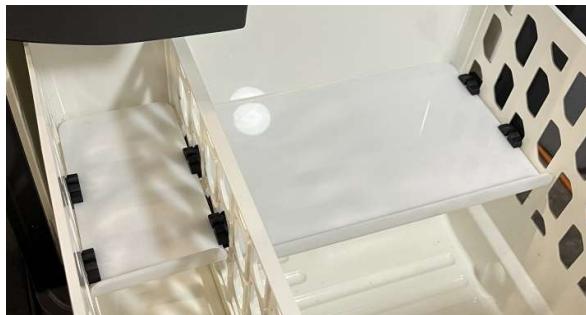

Figure 3 – All 6 shelf supports and two shelves installed.

### **Installation complete.**

We hope you enjoy your new fridge shelf. If you encounter any difficulties, please do not hesitate to contact us for advice and support:
